Essay:

My accomplishments for service toward my community are very important to me. I spend a lot of my time giving back to my community. I volunteer for the Red Cross on many occasions. I also have spent time volunteering at several different animal humane societies. I think that that is the best way that I could be spending my time. I love hanging out with the animals and learning about all the different problems animals go through. I also love helping those animals find safe and loving owners.

I also have done Relay for Life. I did this through National Cancer Honor Society. It was one of the best experiences of my life. I enjoyed helping raise awareness for cancer. It was also nice to see so many other people helping out.

Volunteering for the Amigos Center was great. I helped paint and refurbish the church. It was really nice helping out. I now hope to paint and help out with volunteering for that church more often.

I did Taste of Collier. That was really cool and there was so many people helping out. I am going to be doing that again this year. It was really fulfilling. I hope to encourage more of my friends to join me this year.

I sponsor a child in Vietnam. I may not be the most well off in the money department but I think that you should still help if you can. I worked for the money and raised enough to sponsor this little girl. I will be continuing to sponsor her for as long as I possibly can. Hopefully that is for as long as I live. I want to get more children and teenagers to start to sponsor these children that are underprivileged. It is really important to do to help make the world a more harmonious place to live. I want to start a program in my school where we raise money and sponsor different children in different countries. This could be a very excellent learning experience for the students in my school. They could write letters to these children and it could enlighten them about the world around them.
